

JOSUE MANCILLA

SENIOR FULLSTACK DEVELOPER

Tarija, Bolivia, ☎ +591 67967091, ✉ jujomago@gmail.com, 🔗 linkedin.com/in/jujomago

SUMMARY

Highly skilled FullStack Developer with **10 years of extensive experience** working on **diverse projects** for companies across a wide range of business sectors, including **Entertainment** (Fandom, Shutterfly), **Asset Management** (Accruent TMS), and **Job Search** (Indeed), with experience in **Latin America and the U.S.** Proficient in technologies such as **React, TypeScript, JavaScript, Next.js, Node.js, REST API, PostgreSQL, and MongoDB**. Experienced with design systems like **Bootstrap, Material Design, and Tailwind**. Experienced working with **Agile methodologies** and **applying SOLID principles** to deliver **scalable and maintainable solutions**.

WORK EXPERIENCE

Tech Ventures - (January 2025 – Present)

- **Full Full-Stack Developer for PetScoutly**, an independent web platform designed to support lost pet recovery and pet adoption management. Developed and maintained the application using Next.js and React, implementing responsive user interfaces with Tailwind CSS. Integrated real-time push notifications using OneSignal and implemented data access and persistence with PostgreSQL through Prisma ORM. Applied Vibe Coding practices leveraging OpenCode and Antigravity to accelerate development workflows and improve developer productivity. Optimized application performance, routing, and overall user experience. Deployed and maintained the platform on Vercel and managed source control using GitHub.

Technologies: Next.js, React, JavaScript, Tailwind CSS, PostgreSQL, Prisma, OneSignal, Git, GitHub, Vercel, OpenCode, Antigravity

- **Full-Stack Developer for Bolivia API**, a public REST API designed to provide information about tourist destinations in Bolivia, conceived as an educational and cultural impact project for teaching API architecture, technical documentation, and service consumption. Developed and maintained the API using Node.js and Express, including relational database design with PostgreSQL and secure API endpoint implementation. Built a private single-page Admin Panel using React and TypeScript to manage data efficiently and ensure data integrity. Created and maintained public API documentation using Docusaurus and OpenAPI to improve usability and developer onboarding. Led the deployment process using Vercel and Supabase to ensure high availability and reliability, and leveraged GitHub Copilot to improve development efficiency and productivity.

Technologies: Node.js, Express, React, TypeScript, PostgreSQL, OpenAPI, Docusaurus, Vercel, Supabase, GitHub Copilot

Encora (Feb 2016 – Nov 2024)

- **Frontend Developer** for **Accruent TMS**, a web-based Computerized Maintenance Management System (CMMS) designed to streamline asset management, work orders, and compliance. Collaborated within a cross-functional Scrum team to develop and optimize key dashboard components using React, Redux Toolkit, and Material UI. Improved user experience through responsive design implementations and integrated frontend services with backend systems using GraphQL. Contributed to a shared UI library documented with Storybook to enhance component reusability and development efficiency. Ensured software reliability by implementing comprehensive component testing and maintaining high code quality standards.

Technologies: React, TypeScript, Redux Toolkit, Material UI, GraphQL, Storybook, HTML5, CSS3, JavaScript

- **Frontend Developer** for **Preservica**, a high-capacity digital preservation and file storage platform. Contributed to the development and enhancement of core application features using React, Redux Toolkit, and TypeScript, with a strong focus on performance, scalability, and long-term maintainability. Designed and implemented reusable, responsive UI components using Material UI and Styled Components to ensure visual consistency and an improved user experience. Integrated frontend applications with RESTful services and actively supported maintenance, bug fixing, and stability improvements for a corporate website built with Next.js.

Technologies: React, TypeScript, Redux Toolkit, Material UI, Styled Components, REST APIs, Next.js, HTML5, CSS3, JavaScript

- **Frontend Developer** for **Fandom**, a tabletop RPG gaming platform. Contributed to the development of a game management dashboard, building core user interface components using React, Redux Toolkit, and TypeScript. Developed responsive and reusable UI components with Material UI and Styled Components to support gameplay management and ensure a consistent user experience. Integrated frontend applications with backend services using GraphQL and supported the stability and maintenance of a corporate website built with Next.js.

Technologies: React, TypeScript, Redux Toolkit, Material UI, Styled Components, GraphQL, Next.js, HTML5, CSS3, JavaScript

- **Frontend Developer** for **Indeed**, one of the world's largest job search and hiring platforms, serving millions of users through high-traffic, consumer-facing web applications. Developed and maintained production-ready features using React and TypeScript, ensuring performance, scalability, and code quality. Improved application stability by implementing unit and automated testing using Jest, Enzyme, and TestCafe. Built and documented reusable UI components with Storybook to promote consistency and development efficiency. Acted as Release Manager, overseeing CI/CD pipelines with Jenkins and managing version control workflows with GitLab to ensure reliable and timely deployments.

Technologies: React, TypeScript, Redux, Jest, Enzyme, TestCafe, Storybook, Jenkins, GitLab, HTML5, CSS3, JavaScript

- **Full-Stack Developer** for **SISCARD**, a secure identity management solution. Designed and implemented the frontend architecture using React, building scalable and maintainable user interfaces. Developed and integrated a secure authentication server based on OpenID using Node.js and Express, handling backend logic and API interactions. Contributed to backend development tasks, server configuration, and application-level unit testing to ensure security, reliability, and long-term maintainability of the system.

Technologies: React, TypeScript, Node.js, Express, OpenID, Material UI, HTML5, CSS3, JavaScript

- **Frontend Developer** for **Tribal Planet**, a digital experience platform focused on social, economic, and environmental impact. Contributed to CMS and web store feature development using React and Redux. Improved platform performance and usability through refactoring and bug fixing. Worked closely with backend and mobile teams to ensure seamless API integrations and performed unit testing to maintain software reliability.

Technologies: React, Redux, Redux Thunk, Redux Saga, Material UI, HTML5, CSS3, JavaScript

- **Backend Developer** for **InCostaRica**, a travel and lifestyle application delivering location-based recommendations. Designed and implemented RESTful APIs using WordPress as a headless CMS, exposing structured content to mobile applications and external consumers. Developed custom endpoints, managed data modeling and persistence with MySQL, and ensured secure, performant, and reliable API communication. Worked within a Kanban-based agile workflow, adapting quickly to evolving requirements while maintaining API stability and consistent performance.

Technologies: PHP, WordPress, MySQL, REST APIs, Swagger, GitLab

- **Frontend Developer** for **Shutterfly**, contributing to multiple internal projects across different technology stacks. Developed user interfaces using React, BackboneJS, CoffeeScript, and Vanilla JavaScript (ES6). Participated in Scrum-based development cycles and contributed to building and maintaining scalable frontend solutions for internal platforms.

Technologies: React, Redux, BackboneJS, CoffeeScript, Vanilla JavaScript (ES6), Jasmine, GitHub

AssureSoft (Mar 2015- Dec 2015)

Full-Stack Developer for **Autobox**, an omnichannel customer service and workforce optimization platform. Developed and maintained end-to-end features across frontend and backend layers, building user interfaces with AngularJS and implementing RESTful APIs using Node.js and Express. Designed and integrated data persistence with MongoDB, supporting scalable and reliable application workflows. Ensured code quality and system stability through unit and integration testing using Mocha. Collaborated within Scrum-based agile teams to deliver features efficiently, maintain application reliability, and meet project timelines.

Technologies: AngularJS, Node.js, Express, MongoDB, Bootstrap, jQuery, Mocha, HTML5, CSS3, JavaScript

Freelance (2011 – 2015)

Full-Stack Developer for **Early-Stage and Freelance Web Projects**, delivering end-to-end web solutions across multiple industries. Developed websites and web applications from scratch, handling both frontend and backend responsibilities. Built custom WordPress themes and CMS-based solutions, implemented RESTful backends using PHP, Laravel, and CodeIgniter, and designed relational databases with MySQL. Created responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap, ensuring cross-browser compatibility and optimized performance. Applied SEO optimization strategies, improved site visibility, and maintained production systems. Collaborated directly with designers and stakeholders, managing projects independently and delivering solutions aligned with business requirements.

Technologies: PHP, Laravel, CodeIgniter, WordPress, MySQL, JavaScript, HTML, CSS, Bootstrap, jQuery, REST APIs, SEO

EDUCATION

Udemy, Tarija, Bolivia React: from novice to expert (Hooks & MERN) (2023)

Udemy, Tarija, Bolivia TypeScript Complete Guide (2023)

Mobile Academy, Tarija, Bolivia React.js: Advanced (2022)

Bolivia's Catholic University, Tarija, Bolivia Cross Platform Mobile Development (2015)

EscuelaIT, Tarija, Bolivia Web Development, JavaScript, HTML, CSS (2012)

Juan Misael Saracho University, Tarija, Bolivia ,Bachelor of Science (B.S.), Computer Science (2007)

SKILLS

Programming Languages & Runtimes: JavaScript (7 years), Typescript(7 years), NodeJs (3 years)

Frontend Technologies: ReactJS (6 years), CSS/SASS (10 years), HTML(10 years), Bootstrap (4 years), Tailwind CSS (3 years), Material UI (3 years)

Backend Technologies: NextJS (3 years), ExpressJS (3 years), RESTful APIs(6 years), GraphQL (3 years)

Databases: PostgreSQL (3 years), MySQL(3 years), Firebase Store(2 years), MongoDB((2 years)

Tools & Development Practices: Git, GitHub (7 years), Docker, Kubernetes (2 years), AWS (1 year), Agile, Scrum (7 years), Jest, React Testing Library (6 years), SOLID Principles (7 years)

LANGUAGES

English B2+ (Upper-Intermediate) | **Spanish** – Native
